

I want to start off by saying that Grab the Torch has been one of the experiences of my life that I shall not forget. One of the experiences that altered my point of perspective was having Katie Pulsifer speak to us grab the torch girls, about her career & her life story. One thing that touched me the most about the way she depicted her journey to us was that in her life although she had an amazing paying job, a good husband, she felt a lot of emptiness & felt unsatisfied. The reason why this touched me so much, was because I've always been so focused in my studies and school work, thinking about how hard work leads to being successful, which leads to being wealthy. Pulsifer's story taught me that no matter how much wealth you obtain, money cannot buy happiness, and therefore she decided to fulfill her passion, which isn't as high paying, but as she described, she had never been happier. This opened my eyes to really believe in MY passion & to fulfill what I desire no matter what comes along with it. Grab the torch has not only filled my knowledge, but it has also taught me several things that I can't & won't forget, for as long as I live. The experiences themselves will still within my memory, for a long time, and I'm more than glad that I have spent the week with an amazing staff & amazing girls that I made beautiful memories with, I will forever be grateful for these 7 days :)
